

SB 17: TRANSPARENCY IN DRUG PRICING

THE PROBLEM

U.S. faces steep hikes on prescription drugs

Drug companies are setting record high prices at whatever the market will bear

Payers can't plan for unexpected budget-busting price increases

SB 17

CAN HELP. THIS LEGISLATION WILL BRING DRUG PRICING OUT OF THE DARK AND ADDRESS A GROWING AFFORDABILITY CRISIS. IF SB 17 PASSES:

Drug companies will give payers notice of major price increases for the most expensive drugs

Lawmakers can review historical trends on drug costs to inform solutions

Payers can plan ahead for significant price increases on medications

Public will have access to basic information on what drives price hikes and drug spending

NEARLY

90% OF AMERICANS SUPPORT DRUG PRICE TRANSPARENCY

Source: Kaiser Family Foundation

SO WHAT ARE WE WAITING FOR?

There's no reason to operate in the dark. We need to bring drug price transparency to California and lead the fight for long-term health care affordability. **Let's pass SB 17 (Hernandez).** Full bill language here.
