

# **DATA SHARING TO DRIVE CARE COORDINATION BETWEEN HEALTH & HOMELESS SERVICES**

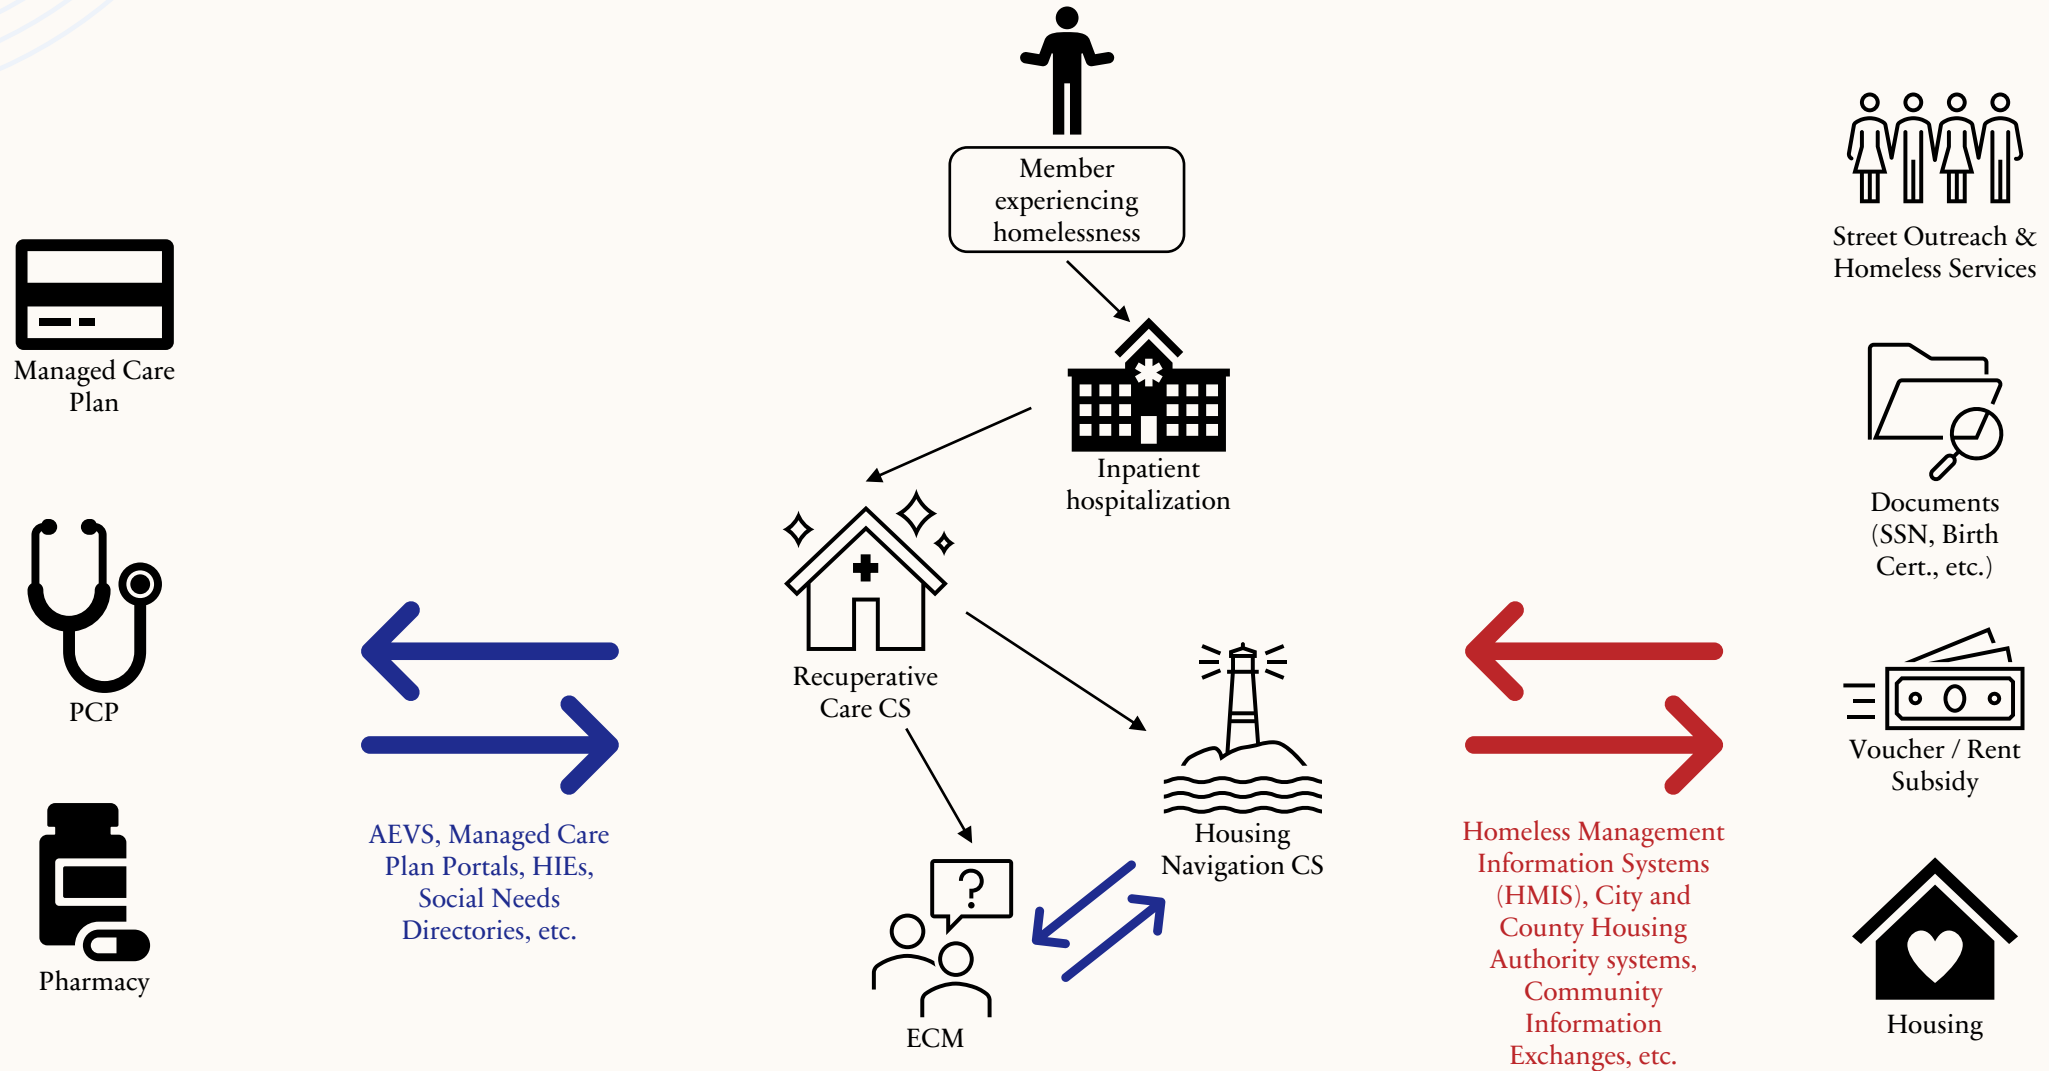

Alison Klurfeld, Klurfeld Consulting

March 29, 2023

# A MATTER OF PERSPECTIVE

# A MATTER OF PERSPECTIVE

# KEY TAKEAWAYS

## HOMELESS SERVICES / HOUSING IS A SEPARATE, COMPLEX SYSTEM

- Multiple providers and government entities including Continuums of Care, Housing Authorities, Counties, Cities, and Nonprofits
- Different data sharing and privacy standards (HMIS standards through HUD)
- Historical fear of health care inappropriately “dumping” on homeless services
- Housing is not an entitlement so “referrals” work very differently

## NEED TO UNDERSTAND USE CASES BIDIRECTIONALLY

- Health care needs access to housing status information, service providers w/relationships with the patient / member, and interim / permanent housing resources
- Homeless services and housing need access to health coverage & provider information, access to physical health, mental health, and SUD treatment for their clients, assistance with resources for aging / disabled clients to live independently, and funding for more housing.

# THANK YOU
